REST APIs

Firebase

Riverpod

GetX

BLoC

Python (Django – Learning)

Google Maps & Polyline

WebSocket

MySQL / PostgreSQL

Git & GitHub

EXPERIENCE

Flutter Developer
SM Technology, Betopia Groups

 March 2026 – August 2026

 Dhaka

- Developed and maintained cross-platform mobile applications using Flutter.
- Built responsive and scalable interfaces using clean architecture principles.
- Implemented state management with **Riverpod** and **GetX**.
- Integrated REST APIs, backend services, and real-time application features.
- Worked on production applications targeting both Android and iOS.

Junior Developer
QueryBD

 February 2024 – August 2024

 Gazipur, Dhaka

- Developed software solutions for business operations.
- Assisted in inventory systems and client dashboard development.

SELECTED PROJECTS

Aira (Client Project)
Flutter, Google Maps, REST APIs, WebSocket

 Hospitality & Reservation Platform

- Developed Guest and Host workflows for hotel, vehicle, and place reservations.
- Integrated **Google Maps**, REST APIs, and WebSocket for location services, reservations, and real-time updates.
- Implemented Host property management and responsive cross-platform interfaces.

B2B Solutions (Client Project)
Flutter, Riverpod, REST APIs

 Vendor-to-Vendor Business Platform

- Developed a scalable B2B platform for vendor-to-vendor business operations.
- Implemented **Riverpod**, REST APIs, real-time messaging, Google Maps, and Geolocator.
- Built responsive interfaces and business workflows for vendor communication.

Geo Paping (Client Project)
Flutter, GetX, WebSocket

 Property Valuation & Contractor Site Management

- Developed role-based property assessment, valuation, billing, and contractor management features.
- Implemented **GetX**, WebSocket, and responsive interfaces for multi-role workflows.
- Application submitted** for production deployment.

Bridge Network (Client Project)
Flutter, REST APIs, Firebase

 Mentorship & Social Networking Platform

- Maintained a two-role social platform connecting **Mentors and Mentees**.
- Fixed production bugs and resolved API, navigation, registration, and workflow issues.
- Prepared and released application updates for both **Android and iOS**.

 Play Store

 App Store

Boujee Pet Service (Client Project)
Flutter, REST APIs, Firebase

 Pet Grooming & Care Booking Platform (Customer App)

- Built the customer-facing app for discovering, booking, and managing pet grooming and pet-care services.
- Implemented service browsing, booking flow, and account/profile management.

EDUCATION

M.Sc. in Computer Science & Engineering
(Data Science)

Daffodil International University

 2026 – Present

 Dhaka

B.Sc. in Computer Science & Engineering
Daffodil International University

 January 2022 – January 2026

CGPA: 3.49 / 4.00

HSC
Tejgaon College

 2018 – 2020

GPA: 4.50 / 5.00

SSC
Government Gournadi Pilot Secondary School

 2018

GPA: 4.44 / 5.00

TECHNICAL SKILLS

- Mobile: Flutter, Dart, Android, iOS
- State Management: Riverpod, GetX, BLoC
- Backend: REST APIs, Firebase, Firestore
- Programming: Dart, Python (Django – Learning), Java, C
- Database: MySQL, PostgreSQL, Firebase
- Maps / Location: Google Maps, Polyline, Geolocator
- Real-time: WebSocket, Firebase Realtime Database
- Tools: Git, GitHub, Android Studio, VS Code
- Research: Machine Learning, Data Analytics

PROBLEM SOLVING

LeetCode: Lisan00 – 140+ Problems Solved (Python)

Beecrowd: MD.LisanIslam – Top 1%

Codeforces: Lisan-5026

ACHIEVEMENTS

Programming Contests
Participated in the “Take Off” Programming Contest during Spring-2022 and Fall-2022.

ICPC Participation
Competed in ICPC during the 2021–2022 and 2022–2023 seasons.

Algorithm Challenges
Participated in “Unlock the Algorithm” Fall-2023.

STRENGTHS

- Delivered the complete frontend implementation for the customer application.

Problem Solver

Team Player

Adaptable

Self-Motivated

Innovative

Leadership

Attention to Detail

Boujee Employee (Client Project)

Flutter, REST APIs, Firebase

- 📅 Pet Grooming Staff & Booking Management Platform (Employee App)
- Built the companion employee app for managing bookings, schedules, and grooming service assignments.
- Implemented staff-facing workflows to track and update service task status in real time.
- Delivered the complete frontend implementation for the employee application.

Allo Taf (Client Project)

Flutter, REST APIs

- 📅 Android Job Searching Platform
 - Developed an Android platform for discovering and searching small job opportunities.
 - Implemented job listings, search, filtering, user interaction, and API-based workflows.
- 📱 Google Play

NoteHUB

Flutter, Firebase

- 📅 Social Media Note Sharing Platform
- Developed a cross-platform note-sharing platform with Firebase backend support.
- Implemented notes, likes, comments, reports, search, friends, chat, and admin moderation.

Doctor Lagbea

Flutter

- 📅 Doctor Appointment Booking Application
- Implemented separate Doctor and Patient roles with doctor search and appointment booking.
- Added appointment serial numbers and medical-record management for doctors.

My Shop

Java Swing, SQL, XAMPP

- 📅 Shop Management Application
- Developed shop sales, purchase, and inventory management functionality.
- Implemented item creation, updating, deletion, and SQL-based data management.

DailyS

Python Tkinter, Firebase

- 📅 Student-Teacher Communication Platform
- Developed teacher/student accounts, 1-to-1 chat, group chat, and group management.
- Built the desktop interface using Python Tkinter with Firebase backend support.

PUBLICATION

Carambola Leaf Disease Dataset

Mendeley Data

- 📅 December 2024
- Published a labeled image dataset of carambola leaf diseases for research and analysis.
- data.mendeley.com/datasets/jn857kmcnf/1
